SUMMARY

A web developer with over 6 years of full-time experience, split between working within a front-end and back-end role on a variety of technologies. Front-end experience includes working within Java, .NET and PHP environments with the primary tools being jQuery, JSP, Twig, XML, X/HTML and CSS. Back-end experience has been within a PHP environment, using various frameworks and open source applications.

EXPERIENCE

Network Solutions (*October '07 - Present*)

Time spent at Network Solutions has led to experience in various roles. Initially hired as Web Designer I then eventually transitioned in a role within the Engineering organization.

Software Engineer III (*April '11 - Present*)

Senior member of the Storefront Front-End Engineering team, responsible for contributing forward-thinking, long-term solutions for the NetworkSolutions.com corporate storefront.

- Lead the implementation of the SASS CSS framework
- Acted as **Engineering Lead and Point of Contact** for the creation of a Mobile version of the customer facing 'Account Manager' application, which was launched in September 2011
- Lead Developer for SilverStripe CMS powered properties

Software Engineer II (*November '09 - April '11*)

- Participated in all phases of Software Development
- Developed many JSP tags and pages, including architecting sections of the website
- Created networksolutionsreferrals.com, a PHP application which allowed Network Solutions to implement a referral program
- Responsible for assessing and providing level of effort estimations for proposed projects
- Provided after hours support for software deployments
- Telecommute as a member of an internationally distributed team
- Manage multiple projects and development cycles in unison
- Interface with QA, Marketing, and Analytics teams to ensure projects meet business requirements with a high level of quality

Web Designer III (*June '09 - November '09*)

- Handle customer escalations and act as backup supervisor, as needed
- Developed an interactive javascript application that allowed customers to annotate proposed designs with their desired changes - DEMO: mitchviner.com/project-example/revisions
- Assist in creating bids for custom development requests

- Managed 5-10 projects at a time
- Mentored new employees
- Supervised a group of 5 interns
- Consistently achieved cross-sell goals

Establish Web Design, LLC (April '09 - Present)

Web Developer

Freelance web development, primarily using the SilverStripe and Magento Ecommerce platforms. Working directly with clients to conceptualize, research and build custom web applications.

- Built highly customized Magento Ecommerce website that targets the manufacturer's distributors and allows them to create custom promotional items and branded sales flyers. This project included the development of a custom Magento Theme, product slider and product configuration wizard as a replacement to the standard product page. Viewable at: geminiindustries.com
- Developed various custom website templates to allow a local Print Design Studio to begin providing web design as a service to their clients.

Mineral Area Office Supply (September '05 - October '07)

Web Designer / Developer

Oversaw all aspects of the design and development of the company website, including architecting and building a custom ecommerce solution using classic ASP. This website provided customers with the ability to manage their account, place new orders and request custom quotes. Included a product catalog with 30,000+ SKU's.
